Portfolio

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript (ES6+), SQL, HTML5, CSS3

**Frameworks & Libraries:** React.js, Node.js, Express.js, Socket.io, Tailwind CSS

**Cloud & DevOps:** AWS (EC2, IAM, Lambda, CDN), Docker, Jenkins, CI/CD Pipelines

**Databases:** MongoDB, MySQL, NeonDB, Redis, Mongoose ODM

**AI & Gen-AI:** Prompt Engineering, LangChain, RAG pipelines, LLM APIs

**Developer Tools:** Git, GitHub, Postman, VS Code, Copilot, Claude Code

## EXPERIENCE

### Full Stack Developer Intern

April 2026 – June 2026

*Aascharya Wellness Private Limited*

- Engineered production-ready full-stack solutions using **React.js**, **Node.js**, and **MongoDB**, implementing **Google OAuth 2.0** and server-side caching to reduce system latency by **40%** and accelerate client onboarding by **35%**.
- Optimized enterprise cloud infrastructure by deploying assets via **AWS S3** and **CloudFront CDN**, streamlining media delivery pipelines and boosting production application performance by **60%**.

### Software Development Intern

Nov 2025 – Jan 2026

*AceMagick*

- Architected a scalable serverless ecosystem via **AWS Lambda** and **API Gateway**, and engineered **15+ Node.js REST APIs** for CRM integration, reducing manual data entry by **40%** and boosting automated lead-capture by **25%**.
- Drove full-lifecycle **Agile** development using **Git/GitHub**, executing **50+ Postman** test cases and comprehensive code reviews to achieve a **98% bug-free** release rate and ensure **99.9% system uptime**.

## PROJECTS

### DevMeet (AI-Integrated Networking Platform) | MERN, Socket.IO, LLM API, AWS | [Live Link](#)

- Developed a collaborative peer-learning platform featuring a **MongoDB aggregation**-based profile recommendation engine, integrating **Redis caching** to bypass heavy queries and reduce API latency by **85%**.
- Integrated the **LLM API** for a 24/7 study assistant and **Socket.io** for real-time peer messaging, alongside a **cached** alumni discovery section, boosting user retention by **50%**.
- Architected a secure backend featuring a multi-layered authentication pipeline (JWT, bcrypt, OTPs) and **Cloudinary** integration for **40% faster** asset delivery, successfully deploying the architecture on **AWS EC2**.

### MotluPets (E-Commerce Platform with AI Integration) | MERN, Python, LLM APIs, AWS | [Live Link](#)

- Engineered a lightweight Python microservice utilizing basic **LLM APIs** and **prompt engineering** to deliver smart product recommendations alongside the core MERN backend.
- Established optimized backend performance by implementing **Redis caching** for product data, improving average API response time by **35%** and reducing cart abandonment by **15%**.
- Containerized application services with Docker and engineered a fully automated **Jenkins CI/CD pipeline** on **AWS EC2**, streamlining model and app deployment times by **70%**.

## EDUCATION

### Oriental Institute of Science and Technology

Bhopal, India

*Bachelor of Technology in Information Technology (CGPA: 7.59)*

May 2022 – June 2026

### Swami Vivekananda School

Rajgarh, India

*Higher Secondary (12th) - MPBSE – 95.8%*

2020 – 2021

## ACHIEVEMENTS & CERTIFICATIONS

### Achievements & Honors

- Demonstrated algorithmic proficiency by solving **250+ DSA questions** across multiple competitive coding platforms.
- Designed scalable system architecture and led an **8-member team** to deliver all project milestones on schedule.
- Secured the **99th percentile** in the competitive Naukri Young Turk Competition.

### Certifications

NPTEL: Programming in Java | Meta Backend Developer | GitHub Foundations | AWS Fundamentals
